Overall grade C , 2021

About me

Hello, I'm Vuthy, an enthusiastic learner with a passion for exploring new technologies in web development. I thrive on staying at the forefront of industry trends and enjoy the dynamic challenges they present. I pride myself on my ability to easily connect with new people and work seamlessly within a team-oriented environment. My goal is to continually explore and develop my professional career, contributing my skills and adaptability to innovative projects.

Experiences

React.JS

I use React because it's widely regarded as a powerful and popular library with large community for building user interfaces.

Node.JS

I love Node.js because it stands as a key player in the modern web development landscape, empowering developers to build fast, scalable, and data-intensive applications.

MERN Stack

MERN is my first choice because this stack is particularly well-suited for building modern web applications and offers an efficient development experience.

Achievement

Top GitHub commit in Cambodia of November 2023 (No. 61)
